

WOOFER

CA25REY

CA25REY is a 10" High Fidelity woofer with an injection moulded metal chassis. This unit has excellent mechanical matching between paper cone, paper dust cap and high quality rubber surround. A special treatment of the cone produces a well behaved roll off characteristic and reduces potential resonance problems. The magnet system has a T-shaped cross section of the pole piece for low modulation distortion. A relatively large voice coil diameter gives high power handling capacity. An extremely large magnet system provides very high efficiency and low Q. This unit is also available with our patented Dynamic Damping (DD), which improves low bass transient behaviour at high power levels: (CA25REY/DD H 378).

NOTES

Response curve recorded in anechoic chamber (Free-field, 4 pi radiation) with 0.5m microphone distance. The loudspeaker is mounted in a closed box of 28 l net volume.
